

## Supplemental Data

**Supplemental Table 1: AL patient recruitment by center, with relevant AL principal investigator**

|   | <b>Total N patients<br/>(N=41)</b> |
|---|------------------------------------|
| <b>Center name (Leukemia PI)</b>                            |                                    |
| 03 – CHU Lille, France (Quesnel)                            | 14                                 |
| 01 – Hôpital Saint Louis, Paris, France (Dombret)           | 9                                  |
| 06 – CHU Lyon-Sud, France (Michallet)                       | 5                                  |
| 09 – Institut Paoli Calmettes, Marseille, France (Vey)      | 4                                  |
| 10 – CHU Toulouse, France (Recher)                          | 4                                  |
| 11 – Princess Margaret Cancer Center, Toronto, Canada (Yee) | 3                                  |
| 08 – Royal Marsden Hospital, London, UK (Taussig)           | 2                                  |

**Supplemental Table 2: 42-gene panel content**

|                 |
|-----------------|
| ASXL1 ex11-12   |
| BCOR ex2-15     |
| BCORL1 ex2-12   |
| BRAF ex15       |
| CALR ex9        |
| CBL ex8-9       |
| CEBPA ex1       |
| CSF3R ex14      |
| DNMT3A ex 2-23  |
| ETV6 ex1-8      |
| EZH2 ex 2-20    |
| FBWX7 ex9-12    |
| FLT3 ex14-15-20 |
| GATA1 ex2       |
| GATA2 ex2-6     |
| IDH1 ex4        |
| IDH2 ex4        |
| JAK2 ex12-14    |
| JAK3 ex13       |
| KIT ex 8-11,17  |
| KRAS ex2-3      |
| MPL ex10        |
| NIPBL ex3-47    |
| NOTCH1 ex26-34  |
| NPM1 ex10       |
| NRAS ex2-3      |
| PHF6 ex2-10     |
| PTEN ex5-7      |
| PTPN11 ex3, 13  |
| RAD21 ex2-14    |
| RUNX1 ex 3-8    |
| SETBP1 ex4      |
| SF3B1 ex 13-18  |
| SMC1A ex1-25    |
| SMC3 ex1-29     |
| SRSF2 ex1       |
| STAG2 ex3-35    |
| TET2 ex 3-11    |
| TP53 ex 2-11    |
| U2AF1 ex 2-6    |
| WT1 ex7-9       |
| ZRZS2 ex1-11    |

**Supplemental Table 3: Characteristics of patients with standard responses**

|  | <b>Patient 1<br/>(CR)</b>   | <b>Patient 2<br/>(CRi)</b>                     | <b>Patient 3<br/>(CR)</b>  |
|--|---|--|--|
| <b>OTX015 dose level</b>   | 40 mg QD  | 80 mg QD                                       | 160 mg QD  |
| <b>Age/gender</b>  | 74/F  | 72/M   | 62/M   |
| <b>Significant prior history /<br/>known pre-leukaemic<br/>condition</b> | Monoclonal IgM-induced<br>neuropathy controlled with 9<br>cycles of RFC | MDS treated with azacitidine                   | Inv(16) AML controlled with<br>standard induction therapy and<br>high-dose busulfan/ASCT |
| <b>Treated condition</b>   | Post-treatment AML  | Post-MDS AML                                   | Post-treatment RAEB  |
| <b>Prior systemic therapy for the<br/>treated condition</b>              | LDAC  | Idarubicin/cytarabine<br>investigational agent | Azacitidine  |
| <b>Bone marrow blasts at<br/>baseline</b>                                | 94%   | 85%  | 14%  |
| <b>Presence of peripheral blood<br/>blasts at baseline</b>               | YES   | YES  | NO   |
| <b>Myelodysplastic features</b>  | YES   | YES  | YES  |
| <b>Karyotype</b>   | Normal  | Normal   | Complex;<br>without Inv(16)  |
| <b>Molecular biology</b>   | No abnormality  | NPM1 <i>mut</i> *<br><i>flt3 wt</i>            | P53 <i>mut</i>   |

ASCT: autologous stem cell transplantation; CR, complete remission; CRi, complete remission with incomplete recovery of platelets; LDAC: low-dose cytarabine; MDS: myelodysplastic syndrome; *mut*: mutated; NPM1: nucleophosmin 1 gene; *wt*: wild type; RAEB: refractory anaemia with excess of blasts; RFC: rituximab, fludarabine, cyclophosphamide.

\* NPM1/ABL1 mRNA ratio 1937% at baseline; dropped to 0.039% at the end of cycle 1.
